

# Emojis

Apart from the emojis that appear on smart phones these days, we can make special type-high emojis for you from your black and white artwork.

Therefore, emojis will not be restricted to smiley faces etc but can also include other clipart such as heart shapes, wedding rings, birthday cakes etc.

As these are made 'type high', you can use them with your metal or brass type as shown in the image below.

These are examples of standard emojis as often found on smart phones.

Remember, we can create virtually any black and white image into a type-high die. All we ask for is that you send/email us good quality artwork. If you do not have good quality artwork, then we may be able to tidy up your artwork but a cost will be incurred which we will advise you of before we take it any further.

The cost of type-high dies vary with the complexity of the artwork and once again, we can quote you on sight of artwork.

Currently, type-high emoji dies are made in brass only.
